Beautiful! Stunning! I felt like I was on a LOTR movie set. Really looking forward to the full release. Everything about this is great. Very imaginative. The first experience that made me feel like an actor in a movie. Great work devs!. Short but scary demo. Nice environment. Lots of talking.. Very good graphics. Great atmosphere. I'd buy it. Where is it?. It's not a big demo so it doesn't take long to download and play, I suggest everyone who is interested in story based games to at least check it out. The graphics of the environment needs an overhaul in some places, but the locations are interesting . The demo is really short, but it does give you a feel for the game, and it looks to be amazing. The place you arrive at before the demo ended left me in awe as I gazed into the darkness of one of the most interesting and imposing locations I've seen in VR.

Played with Rift without any issues.. Sorry, this game just didn't catch me while I was playing. After playing the demo I think it is likely I will not buy the game.
