Literally the best game I have ever played. Everything on the trailer is accurate, and I want a sequel, but due to the lack of community grown (compared to other Mojang games) it probably won't happen. The IGN review is an absolute liar, don't trust him, he can't play video games. Either way: Buy the game, but good luck trying to find people to play with outside of the 10 people who still play the game. Don't buy the game, just play the (extremely buggy) demo, and play with friends who also have the demo. It's a great game either way, just it's a fat rip on the community side of things (again, bar the 10 people).
